

HONEYWELL RETURNABLE CONTAINER PROGRAM | EUROPE

Reduce Costs and Accelerate Your Research

A man in a white lab coat and a high-visibility yellow safety vest is shown in profile, talking on a black walkie-talkie. He is holding a clipboard with a pen in his left hand. The background is a blurred laboratory setting with shelves and equipment. The entire image has a blue color overlay.

REDUCE YOUR SOLVENT STORAGE, HANDLING, AND DISPOSAL COST BY 98%.*

BETTER FOR THE ENVIRONMENT

With virtually no packaging waste, no hazardous disposal costs, and no rinsing done on site, your lab will be greener and more environmentally friendly.

SAVE 50% IN STORAGE COSTS

Our solvents take up 50% less space than glass bottles, reducing your storage costs by half.

EASIER TO TRANSPORT

With easy to grip handles and shatter proof stainless steel construction, our returnable containers are simple to transport.

SAFER FOR STAFF

Minimize fire risk, the incidents of spillage, and reduce the risk of staff being exposed to hazardous solvents.

*Based on usage of 250 cases (4 * 2.5L) of solvent per year, compared to one 200L returnable drum.

COMPLETE RETURNABLE CONTAINER SOLUTION

Think big. Partner with Honeywell Research Chemicals and scale up from micro scale usage to macro scale production volumes.

Honeywell returnable containers are made of high quality stainless steel (V2A) and are specifically engineered to store, transport and dispense solvents. Our returnable containers come in various sizes ranging from 5 L to more than 1000 L and include standard sizes such as 7 L bottles and 18 L, 45 L and 200 L drums. To complete our offering, we also supply accessories for dispensing that allow safe and efficient solvent retrieval.

7 L Stainless Steel Bottles

Our stainless steel bottles are suitable for all solvent types and unlike glass, do not break. The bottle opening is like that of a glass bottle, and allows for the same dispensing systems or analytical instruments connections to be used. The metal handles make it easy to carry and they take up less space than three 2.5 L bottles. In addition, to the standard 7 L bottle we also offer solvents in 5 L and 10 L bottles and the corresponding accessories.

Available Accessories for Solvent Dispensing

Dispense solvent in three different ways; pouring directly from the bottle, through pressure based dispensing, or via a direct connection to the HPLC instrument.

Bottle Dispensing System (SAP 10182845)

Our pump-ball system allows for safe and easy dispensing of all solvents. An inert gas connection using a pressure reducing device ensures contamination-free dispensing.

Pouring System (SAP 10182255)

The simple dispensing system is screwed on the bottle for convenient and safe pouring of solvents into other containers or reservoirs.

Bottle Adapter (SAP 10182434)

The bottle adapter is screwed on the bottle and enables a direct connection to HPLC instruments.

Overview of Specifications

Stainless Steel Bottles	7 L
Weight	1.8 kg
Height	320 mm
Diameter Ø	193 mm
Operational Pressure	0.5 bar
Closure	Screw cap GL45
Material	Stainless Steel V2A
Approval	1A1

18 L, 45 L and 200 L Stainless Steel Containers

Honeywell returnable stainless steel drums are available both with or without an integrated dip tube for standard and analytical grade solvents.

Containers with a Dip Tube

If you are using high-purity Chromasolv™ solvents for HPLC, or analyzing pesticide residues, dioxins, and furans or PCB, we recommend using containers with an integrated tip tube.

Stainless Steel Bottles	18 L	45 L	200 L
Weight	6.6 kg	12.2 kg	44.5 kg
Height	446 mm	660 mm	970 mm
Diameter Ø	278 mm	363 mm	600 mm
Operational Pressure	0.5 bar		
Closure	Screw cap RD52x1/6"		
Material	Stainless steel V2A		
Approval	1A1		

Dispensing Head (SAP 10182857)

The dispensing head is designed for 18 L, 45 L and 200 L drums with an integrated dip tube. All connectors are pre-assembled, so there is no need for extra tools. The connections can be done via Rectus™ quick connectors.

Containers without a Dip Tube

You can use containers without a dip tube, if you are using standard grade and analytical grade puriss p.a. or ACS grade solvents.

Dispensing System

The dispensing system includes the dip tube, and is screwed on the container. No extra tools are required, the connections can be made using Rectus™ quick connectors.

Stainless Steel Bottles	18 L	45 L	200 L
Weight	6.9 kg	11.4 kg	43.0 kg
Height	446 mm	600 mm	970 mm
Diameter Ø	278 mm	363 mm	600 mm
Operational Pressure	0.5 bar		
Closure	Screw cap RD 48x1/6"		TriSure 2"
Material	Stainless steel V2A		
Approval	1A1		

For 18 L, 45 L and 200 L drums without integrated dip tube:

Dispensing system for:

- 18 L drum (SAP 10182794)
- 45 L drum (SAP 10182795)
- 200 L drum (SAP 10304981)

Dispensing head for containers with integrated dip tube

Dispensing head for containers without integrated dip tube

Additional Accessories for Returnable Containers

Grounding Set (SAP 10182861)

Stainless steel containers must be electrically grounded to avoid electrostatic discharges before dispensing inflammable solvents.

Ball Pump Quick Connector (SAP 10182433)

For increasing air pressure within container in combination with the dispensing head or system.

Container Adapter (SAP 10304628)

The container adapter is screwed to containers with an integrated dip tube and enables a direct connection with HPLC instruments.

Dispensing Tube (SAP 10302071)

For dispensing solvents in special reservoirs in combination with the dispensing head or system.

Dispensing Hose (SAP 10302073)

A flexible hose for convenient dispensing solvents in special reservoirs in combination with dispensing head or system.

Additional Customer Specific Packaging Options

We offer additional sizes from 5 L to 1000 L including intermediate bulk container (IBCs) and plastic containers for inorganics or organics with low metal content. Additionally, we can provide custom container solutions.

HOW DOES IT WORK?

Getting Started

A Honeywell representative, or an approved distributor partner will provide a custom fit solution tailored to your specific requirements. We recommend having a minimum annual solvent consumption for a certain container size.

If you have changes in your annual solvent demand, you will need to communicate these changes to us. This helps us to adapt to your actual usage so that we can ensure you are delivered the quantity you need.

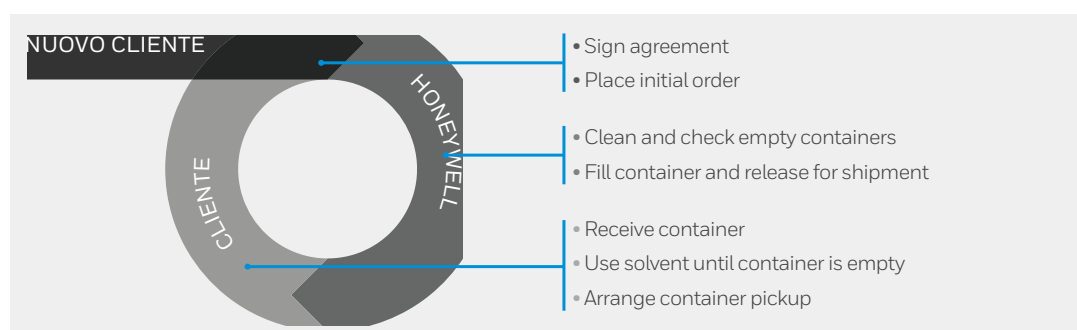

ANNUAL SOLVENT VOLUME ?							
≥ 24 bottles (168 L)		≥ 12 drums (216 L)		≥ 6 drums (270 L)		≥ 3 drums (600 L)	
7 L bottle		18 L drum		45 L drum		200 L drum	
REQUIRED SOLVENT QUANTITY ?							
Analytical grade		High purity		Analytical grade		High purity	
18 L no dip tube		18 L with dip tube		45 L no dip tube		45 L with dip tube	
200 L no dip tube		200 L with dip tube		200 L no dip tube		200 L with dip tube	
DISPENSING ?							
Pouring		Pressure dispensing		Dispensing system		Dispensing head	
Dispensing system		Dispensing head		Dispensing system		Dispensing head	

Placing Your First Order

To initiate the returnable container program, a signed agreement is required specifying the solvents used and the estimated consumption, the container type, and required accessories. Once the order is placed, the returnable containers will be released for shipment by Honeywell. All our stainless steel drums are tracked by bar code. Honeywell will keep complete records of your solvent and container usage to ensure uninterrupted supply. Depending on the agreed process the containers are shipped through your distributor or directly to you.

Returning Your Containers

After consumption of the solvents, please contact SeelzeRC.support@honeywell.com to arrange a container pick-up. Honeywell will work with you directly, or with your distributor to establish a convenient round-trip shipping process. The un-rinsed empty containers with their original labels attached, will be picked up and cleaned by Honeywell.

ACCELERATE YOUR RESEARCH BY SAVING A WEEK OF LAB-TIME PER YEAR.*

GET MORE DONE

Save time testing solvent batches, handling solvent bottles, and connecting and exchanging bottles with your instrument.

EASY TO SETUP AND FLEXIBLE TO USE

The dispensing accessories enable easy, secure and contamination free direct connections to instruments, or multiple dispensing points. After the container is empty, it will be collected and cleaned by Honeywell.

BE CONFIDENT IN YOUR RESULTS

Our returnable containers are filled with quality solvents that have excellent lot-to-lot consistency and come with a detailed Certificate of Analysis.

Honeywell is home to Chromasolv™ high purity solvents for chromatography, which are trusted and relied upon by thousands of scientists, and are referenced in over 6000 peer reviewed publications**.

*Based on usage of 250 cases (4 * 2.5L) of solvent per year, compare to one 200L returnable drum.

Solvents in Returnable Containers

We offer the following solvents grades in returnable stainless steel containers:

- Analytical grade (puriss p.a. / ACS grade) solvents
- Chromasolv™ solvents for pesticide residue analysis
- Chromasolv™ solvents for HPLC
- Chromasolv™ solvents for analysis of dioxins, furans and PCB

The following is a list of the most common Chromasolv™ solvents supplied in standard returnable containers.

To see a complete list of all solvents available in returnable containers, please visit lab-honeywell.com. If you do not find the solvent you need, contact us to ask about custom solvents and solutions.

Product Number	Product Description	Returnable Container Size			
		7 L	18 L	45 L	200 L
34480	Acetone CHROMASOLV™ for pesticide residue analysis, ≥99.8%	x		x	
34850	Acetone CHROMASOLV™, for HPLC, ≥99.8%		x	x	
34967	Acetonitrile CHROMASOLV™ LC-MS, ≥99.9%		x		
34481	Acetonitrile CHROMASOLV™ for pesticide residue analysis, ≥99.9%	x			
34998	Acetonitrile CHROMASOLV™ Plus, for HPLC, ≥99.9%	x	x	x	
34881	Acetonitrile CHROMASOLV™, for HPLC, ≥99.8%	x	x	x	
34851	Acetonitrile CHROMASOLV™, for HPLC, gradient grade, ≥99.9%	x	x	x	x
34888	Acetonitrile CHROMASOLV™, for HPLC, for UV, ≥99.9%	x	x	x	
34496	Cyclohexane CHROMASOLV™ for pesticide residue analysis, ≥99.5%	x	x		
34855	Cyclohexane CHROMASOLV™, for HPLC, ≥99.7%	x			
34488	Dichloromethane CHROMASOLV™ for pesticide residue analysis, ≥99.8%	x		x	
34856	Dichloromethane CHROMASOLV™, for HPLC, ≥99.8%, contains amylene as stabilizer	x	x	x	
02855	Ethanol (Untaxed) CHROMASOLV™, for HPLC, absolute, without additive, A15, ≥99.8%, for license holders only	x			x
34852	Ethanol CHROMASOLV™, for HPLC, absolute, ≥99.8%	x	x		
31063	Ethyl acetate CHROMASOLV™ for pesticide residue analysis, ≥99.9%	x	x	x	x
34858	Ethyl acetate CHROMASOLV™, for HPLC, ≥99.7%	x	x	x	x
34495	Heptane CHROMASOLV™ for pesticide residue analysis, ≥99%	x			
34873	Heptane CHROMASOLV™, for HPLC, ≥99%	x	x	x	
34484	Hexane CHROMASOLV™ for pesticide residue analysis, ≥95%	x	x	x	
34859	Hexane CHROMASOLV™, for HPLC, ≥97.0%	x	x	x	
34485	Methanol CHROMASOLV™ for pesticide residue analysis, ≥99.9%	x			
34860	Methanol CHROMASOLV™, for HPLC, ≥99.9%	x	x	x	x
34885	Methanol CHROMASOLV™, for HPLC, gradient grade, ≥99.9%	x	x	x	x
34956	Pentane CHROMASOLV™, for HPLC, ≥99.0%		x		
34491	Petroleum ether CHROMASOLV™ for pesticide residue analysis, low boiling point hydrogen treated naphtha, bp 40-60°C	x		x	
34863	2-Propanol CHROMASOLV™, ≥99.9%	x	x	x	
34875	Tert-Butyl methyl ether CHROMASOLV™, for HPLC, ≥99.8%	x			
34865	Tetrahydrofuran CHROMASOLV™ Plus, for HPLC, inhibitor-free, ≥99.9%	x	x	x	
34413	Toluene CHROMASOLV™ for analysis of dioxins, furans and PCB, ≥99.7%	x			
34494	Toluene CHROMASOLV™ for pesticide residue analysis according to FDA, ≥99.7%	x		x	
34866	Toluene CHROMASOLV™, for HPLC, ≥99.9%		x	x	
650439	2,2,4-Trimethylpentane CHROMASOLV™ Plus, for HPLC, ≥99.5%		x
