Fluka™ Analytical Standards Technical Support Confidence

Fluka™ Analytical Standards

Advance your analysis with expert technical support

Advance your analysis

Honeywell Fluka™ analytical standards offer a growing range of high quality inorganic and organic reference materials produced according to ISO 9001, and suitable for a wide range of industries and applications. Every standard comes complete with a printed Certificate of Analysis (CoA) and is eligible for free expert technical support – ensuring you have the information you need to quickly start your analysis, and pass relevant audits.

Each CoA includes:

1. Contact and technical support details
2. Expiry date
3. Product number, name and batch
4. General product information
5. Lot specific analytical results
6. Purity test by HPLC, GC, LC-MS, GC-MS and Titration
7. Identity test by NMR, FT-IR or Mass Spectrometry

Honeywell
CERTIFICATE OF ANALYSIS

1. Honeywell Specialty Chemicals Service GmbH D-30318
Service phone: +49 5137 099-100
email: TS_standards@honeywell.com

2. Issue: 05.06.2018 / COA_H00077166/02519100694

3. Article/Product: R1000
Reserpine (3,4,5-trimethoxy-DM), reference material
Batch: 1117X

4. Reference Material (RM)
1. General Information
Formula: C₂₃H₃₁O₉N₂O₂
CAS-No.: [84759-11-6]
Usage:

5. 2. Batch Analysis identity
(NMR)
assay (HPLC)
measurement uncertainty
assay D
melting range

3. Advice and Remarks

6. NMR Spectrum (2D) (15% D₂O, 1% TMS, 90°C, 400 MHz)

7. Mass Spectrum

Retention Time (min)	Area	Height	Width	Height %
1.11	181000	9978	11701.21	94.71
6.109	531	684	6422	1.28
10.893	576	1284	9712	9.01

Limit expensive delays with free expert technical support

If you have a critical question that is not addressed by our documentation, Honeywell Fluka provide fast technical support from experts who have been developing, producing and testing standards for decades, ensuring you get timely, effective help with even the trickiest application questions – potentially saving you hundreds of Euros, and hours of lab-work*.

- We solve the majority of customer product enquiries after one email or phone call.
- More complex application troubleshooting is normally resolved within 5 working days.

Save valuable lab-time using Honeywell custom standards

Producing a standard in-house can be a technically challenging, time consuming and expensive process, requiring you to source materials, purify, and validate your standard.

Our extensive experience enables us to efficiently produce and test custom standards to your requirements for less than it would cost to produce in-house**.

- With all Fluka™ analytical standards manufacturing facilities and technical experts on one site, Honeywell can develop, test and manufacture a simple or complex custom standard to meet your needs.
- Because our custom standards are guaranteed to comply with all specifications and come with full documentation, you can be sure your analysis is reliable and accurate.

Email: TS-standards@honeywell.com

*Assuming an average of 1 hour delay caused by any technical enquiry, with a staff of 2 at hourly cost of €100 each.

**For a customer to create in-house, a 50x 1mL – 20 compound mixture - we estimate approximate cost could be €20100.

Raw materials costs: 20x €200 = €4000. Ordering 20 compounds: 15 min each = 300 min = €500 (labour costs: €100/h). Preparation of the solution (weight of 20 compounds and dissolve): 12 X 3h = €3600 (limited shelf life – 1 month). Validation/Quality control: 12x10 h = €12000. Total cost: €20100.

To order the same mixture from Honeywell would cost approx. 50x € 200 = € 10000. This means you would save approximately €10000.
